-
2. A simple Statement recorder is added in the application. Users budgets result are auto recorder for each day.

[← Go to Dashboard](#)

This is a Simple Statement

Date	Income	Expense	Total
------	--------	---------	-------

No statement found

3. I upgrade routing system also. Without login, no one can now go to another route. If any user wants to go to dashboard and others page without login then he/she go the login page re-directly.
